UST Operator Training Program Overview

We provide Underground Storage Tank Class A, B, and C Operator Training (in accordance with 40 CFR 280, Energy Policy Act of 2005, and States' Regulations):

- **Class A Operator:** Persons having primary responsibility for on-site operation and maintenance of underground storage tank systems.
- **Class B Operator:** Persons having daily on-site responsibility for the operation and maintenance of underground storage tank systems.
- **Class C Operator:** Daily, on-site employees having primary responsibility for addressing emergencies presented by a spill or release from an underground storage tank system.

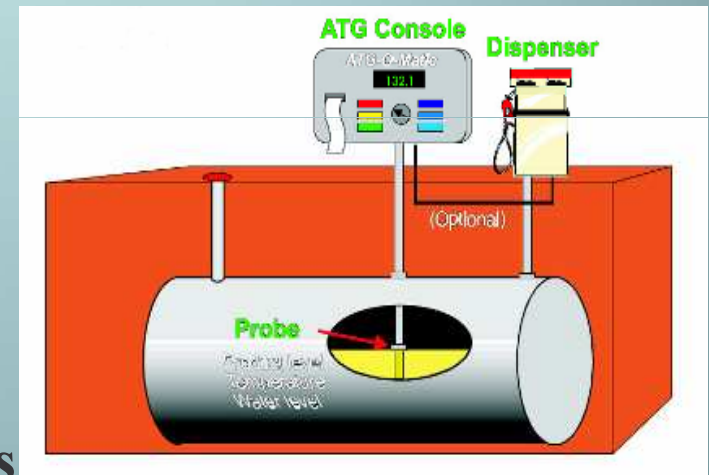

Training Program Overview

- **Our classroom training provides UST Class A, B and C operators with an in-depth understanding of day-to-day operations, maintenance, and recordkeeping procedures for maintaining compliance**
- **We will provide you with a UST Operator Training Manual that is tailored to your facility's UST system(s). No guessing as to if you have pressurized piping or suction piping.**

UST Operator Training Program Overview

- **Section 1 – Overview**
- **Section 2 - Applicability of Federal, State, and Local Regulations**
- **Section 3 -Parts of UST System – What’s Underground?**
- **Section 4 - Spill and Overfill Prevention**
